PROFESSIONAL SUMMARY

Backend Developer with 1.5 years of professional experience building backend application using python frameworks, including Django, Django REST Framework, and FastAPI. Experienced in developing backend systems for AI platforms, e-learning tools, and event management applications. Comfortable with PostgreSQL, JWT authentication, Celery task queues, Docker, and AWS deployments. Writes clean, maintainable code with a focus on performance, security, and scalability.

TECHNICAL SKILLS

Languages: Python
Frameworks: Django, Django REST Framework (DRF), FastAPI, Flask, Celery, React.js
Databases: PostgreSQL, MySQL, SQLite, Redis
API & Auth: REST API Design, JWT Authentication, Session Auth, API Integration
Testing: Unit Testing, API Testing (Postman)
DevOps & Tools: Docker, AWS (EC2, S3, RDS, CI/CD), Git, GitHub
Core Concepts: OOP, Data Structures & Algorithms, Async Processing, Microservices

PROFESSIONAL EXPERIENCE

Amperor Tech | Lahore, Pakistan | *Aug 2024 – July 2026*
Associate Software Engineer

WeMove.ai
- Designed, developed and maintained RESTful APIs for booking management, inventory tracking, and real-time shipment status updates
- Built asynchronous pricing and logistics workflows using Celery, reducing manual coordination overhead
- Integrated AI-driven inventory processing features and contributed to production deployment on AWS

Versana (MatrixLink) (Learning & Performance Management System)
- Collaborated with Flutter developers by designing and developing backend services and RESTful APIs for a mobile learning platform.
- Implemented backend features supporting user onboarding, course delivery, notifications, and employee performance tracking.
- Optimized query performance and API response times to support high-concurrency enterprise usage

Nook (Event Management Platform)
- Developed REST APIs using FastAPI for event creation, scheduling, and participant management
- Implemented JWT-based authentication and role-based access control (RBAC) for secure multi-user access
- Designed backend logic for RSVP workflows, event tracking, and user interaction features

EDUCATION

Lahore Garrison University | Lahore, Pakistan | *2020 – 2024*
Bachelor of Science in Software Engineering
- Relevant coursework: OOP, DSA, DBMS, Web Development, AI, Machine Learning, Operating Systems

ACHIEVEMENTS

- Promoted from Software Engineering Intern to Associate Software Engineer within two months based on performance
- Consistently delivered production-ready features ahead of schedule, contributing to client retention and new project acquisition
